

URBAN MARKET

COLLECTION

 DISPLAYS
Cayuga

Cayuga understands product merchandising today is about fresh presentation, versatility and innovation – often in smaller retail spaces. Retailer needs can be very specific, however budgets don't always allow for a fully custom case. This is where the Urban Market Collection comes in: customizable cases designed on a standard platform.

The Urban Market Collection reflects the latest styles and trends in the industry – helping you keep your look and brand fresh. Designed and manufactured at our own North American facility, the entire collection is fully customizable with a variety of finishes, colours, materials and other options.

And when you work with Cayuga Displays, you can always be confident we'll help you to select the right product and options, so that you have the food presentation that is certain to elevate your customers' experience and enhance your brand – beautifully.

“Longo's is pleased to support Cayuga Displays. Your team's quick service/turnaround for projects has helped us with our millwork for bakery and floral in past projects. More recently your team has come up with some cost effective refrigeration solutions for our bakery and produce.”

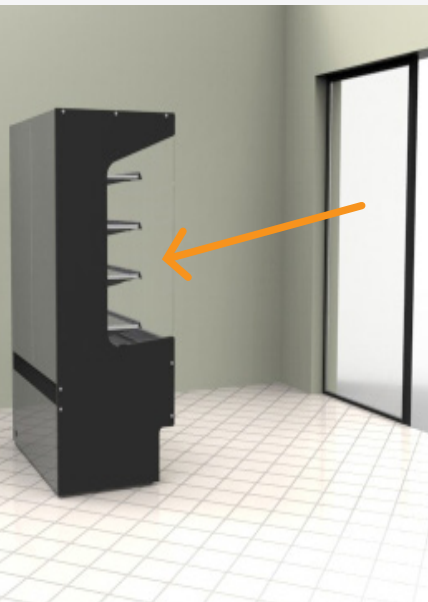

Paul Collette,
Longo's Support Center
Project Manager Real Estate
and Construction

THINGS TO CONSIDER

Showcases are designed to display your refrigerated products at 38-41°F (4-5°C). Showcases are designed to perform correctly when placed in environmental conditions of maximum 75°F (23°C) and 55% relative humidity.

When selecting a showcase and placing it in your store environment, you need to consider the following:

1 Consider nearby doorways

A location near a doorway will affect the airflow and holding temperature of open and closed showcases.

2 Consider nearby windows

Direct sunlight will affect the holding temperature of open or closed showcases.

3 Consider nearby vent sources and fans

HVAC ceiling vents and ceiling fans will affect the airflow of open showcases and could create condensation on the glass of closed showcases.

4 Ensure your display is level and plumb

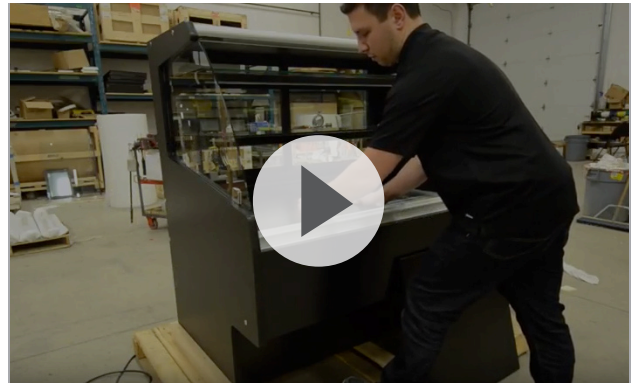

Ensure your showcase is plumb and level to allow for proper drainage of condensation water.

Maintenance

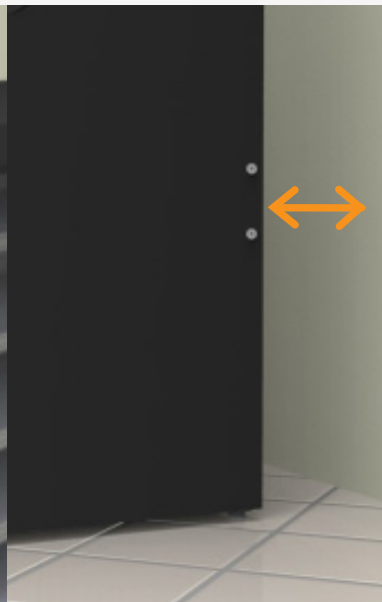

Your showcase will work at its peak performance with regular maintenance. An owners' manual with maintenance instructions is included or you can also check out our online maintenance video.

Watch our maintenance video at cayugadisplays.com/maintenance

5 Leave appropriate space behind displays

A 6" space is required behind any showcase that is against a wall or has a rear obstruction.

6 Clean your display

Use the included brush to regularly wipe away dust. Too much dust will not allow the refrigeration to work properly and could result in damage.

7 No Warm Product in Case

Refrigerated displays are designed to **KEEP COLD PRODUCT COLD** - they are not designed to bring warm product down to a cold temperature. For food safety it is always imperative that warm product be properly chilled (using a blast chiller or cold room) prior to storing in the refrigerated display case.

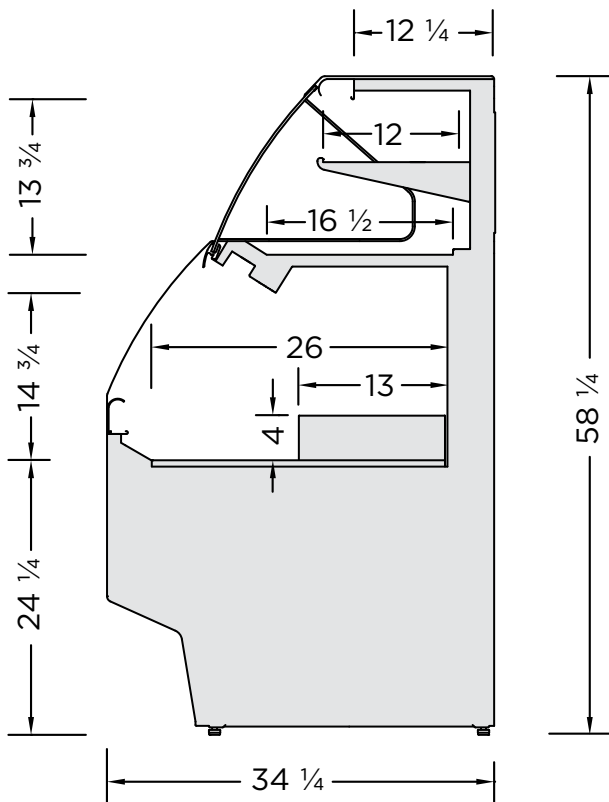

8 Noise

Self-contained cases have compressor motors and fans and these will make noise, just as your household refrigerator makes noise. Keeping your showcase serviced and clean will help keep the noise level under control.

CURVED GLASS COMBINATION SERVICE/ SELF-SERVICE DISPLAY

 REFRIGERATED

MODEL	LENGTH
SSS-38	40 1/4"
SSS-48	49 7/8"
SSS-57	59 3/8"
SSS-76	78 1/2"

FEATURES:

- 3 interior finishes, textured black, white or brushed stainless steel
- Many exterior colors, patterns and wood grain finishes available
- R-134A self-contained refrigeration
- Sliding baffle between the service/self-service areas to create a dry service display
- 12" adjustable tempered glass shelf in the top service display area
- Tilt-out front glass on the top display area for easy cleaning
- Removable 4" riser step in the self-service display area (shelf options available)
- Removable base deck panels for easy cleaning and service
- LED lighting attached to the top ledge of the service and the self-service display
- Thermal rear sliding doors on the service display
- Many custom options available. Refer to the options schedule on next page

SUGGESTED APPLICATIONS:

-  Bakery
-  Restaurants
-  Deli
-  Cafe

Note: Information and specifications may change due to engineering improvements.

SSS-57	115/230	8.8	L14-20P
SSS-76	115/230	9.8	L14-20P

STANDARD OPTIONS:

- Textured black, white or brushed stainless steel interior finish
- Black or white laminate exterior finish
- 12" tempered glass shelf in the service display
- Removable 4"H riser step in the self-service display area
- LED lighting attached at the top of the service and the self-service display
- Thermal glass rear sliding doors on the service display
- Tilt-out curved front glass on the service display
- Sliding baffle for top ambient service display

CUSTOM OPTIONS:

EXTERIOR FINISHES	
Formica laminate finish: ____	
Other laminate finish (specify): ____	
Customer laminate choices	
Oak Veneer Plywood	
- Vertical grain direction	
- Horizontal grain direction	
Birch/Maple Veneer Plywood	
- Vertical grain direction	
- Horizontal grain direction	
Clear Finish applied to veneer	
Stain Finish Choice _____	
1" black McCue impact bumper strip applied to the front of the display	
Other McCue impact bumper strip colors Available upon request	

END PANELS	
Interior laminate the same as exterior	
Mirrored interior	
Brushed Stainless Steel interior	
Mirrored end panel glass	
Stainless Steel T-mold edging	
1" black McCue impact bumper strip applied to the outside of the end panel	
Other McCue impact bumper strip colors available upon request	

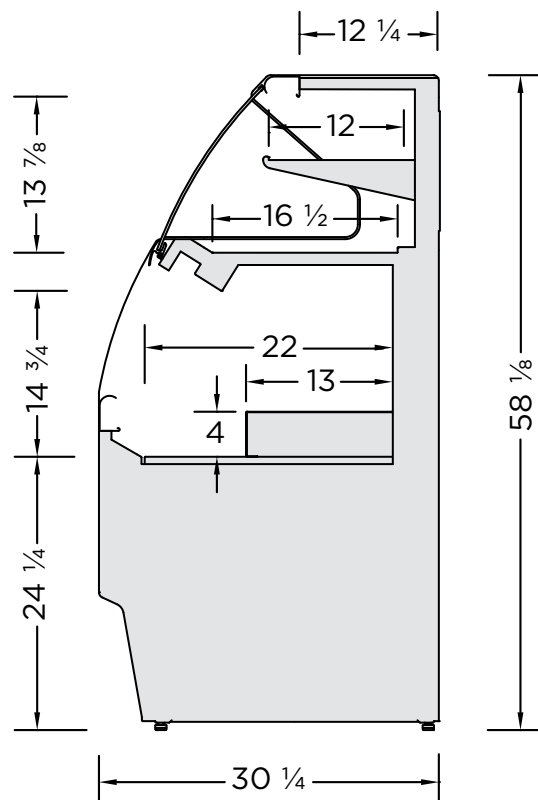

MISCELLANEOUS	
Rear loading doors for the self-service display area	
Heavy duty lockable casters	
Add 1 shelf level to the bottom self-service display area (instead of riser step inlay)	
Mirrored rear sliding doors	
Locks for rear sliding doors	
Wire security grill panel for service display area	
Price tag molding strip for tempered glass shelves	

ADDITIONAL FEATURES:

- Designed to maintain product temperature of 38-41°F with a maximum ambient atmosphere of 75°F/55% humidity
- Hot gas condensate evaporation system
- ETL Listed and Sanitation certified to NSF 7
- 1 Year Parts & Labour Warranty
- Rear air intake, front discharge. Avoid any obstructions in these areas

THREE-LEVEL UPRIGHT SELF-SERVICE DISPLAY - 53"H

 REFRIGERATED

Standard features shown

Custom options available, refer to options schedule on next page

MODEL	LENGTH
MD3M-24-53	26"
MD3M-38-53	40 1/4"
MD3M-48-53	49 7/8"
MD3M-57-53	59 3/8"
MD3M-76-53	78 1/2"
MD3M-96-53	97 5/8"

FEATURES:

- Many exterior finish options available: powdercoat paint, brushed stainless steel, laminates and natural wood finishes
- 3 interior finish options: textured powdercoat black, white and brushed stainless steel
- Other custom options are offered. Refer to the options schedule on the next page
- A LED light strip is mounted on the top ledge of the display area.
- 1-14" and 1-16" adjustable metal shelves with integrated LED lighting.
- The LED lighting is available in various light intensities/spectrums
- Designed to maintain the critical temperature of the products within the display at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity
- ETL electrical certification and NSF 7 standards
- New R-513A (non ozone depleting, low global warming potential) refrigerant used in the self-contained refrigeration system
- The refrigeration system is designed to pull fresh air and heated exhaust air through a front vent integrated in the base of the display
- Remote refrigeration available. Contact Cayuga Displays for details

SUGGESTED APPLICATIONS:

-  Bakery
-  Restaurants
-  Deli
-  Butcher shops

MD3M-96-53	115/230	12.4	L14-20P

STANDARD FEATURES:

- 3 interior finish options: textured powdercoat black, white and brushed stainless steel
- Black or white laminate exterior finish
- Solid End Panels with black or white interior finish
- A LED light strip is mounted on the top ledge of the display area
- 1-14” and 1-16” adjustable metal shelves with integrated LED lighting
- The refrigeration system is designed to pull fresh air and heated exhaust air through a front vent integrated in the base of the display

CUSTOM OPTIONS:

EXTERIOR FINISHES	
Formica laminate finish: ____	
Other laminate finish (specify): ____	
Customer laminate choices	
Brushed Stainless Steel	
Oak Veneer Plywood	
- Vertical grain direction	
- Horizontal grain direction	
Birch/Maple Veneer Plywood	
- Vertical grain direction	
- Horizontal grain direction	
Clear Finish applied to veneer	
Stain Finish Choice _____	
1” black McCue impact bumper strip applied to the front of the display	
Other McCue impact bumper strip colors Available upon request	

END PANELS	
Interior laminate the same as exterior	
Brushed stainless steel interior	
Mirrored interior	
Tempered glass end panels	
Mirrored glass end panels	
1” black McCue impact bumper strip applied to the end panel	
Other McCue impact bumper strip colors available upon request	

MISCELLANEOUS	
Additional shelf with integrated LED lighting	
Tempered glass shelves with integrated LED lighting	
Roll-down thermal night curtain	
Heavy duty lockable casters	

ADDITIONAL FEATURES:

- Designed to maintain the critical temperature of the products within the display at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75° (24°C)/55% humidity. Designed for holding pre chilled product only
- Hot gas condensate evaporation system (most units)
- ETL listed and sanitation certified to NSF 7
- 1 year parts and labor warranty

Formica® Laminate

Formica Group provides surfaces that fuse beautiful design with purposeful functionality. Formica® Products provide versatile surfacing solutions that are inspired by and adapt to the way people live, work and play.

Formica® Brand Laminate offers a broader range of looks than ever before. Transform spaces with our modern laminates that are as beautiful as they are durable. Mix and match solids, patterns and finishes.

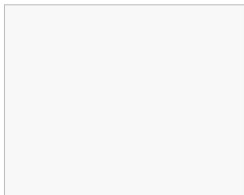

Product Features:

- Postforming
- Durable and Wear-resistant
- Horizontal and Vertical
- Impact Resistant

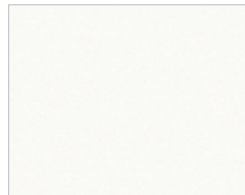

Formica® EliteForm

Our innovative Formica® EliteForm surfacing technology redefines the performance attributes of high pressure laminate to deliver a more durable laminate for today’s market. Formica® Laminate with EliteForm features superior scratch resistance over other laminate brands, the ability to postform to a smaller radius with better blister resistance, and more durable, long-lasting surfaces, including the Gloss texture in horizontal applications. EliteForm comes standard on all Formica® Laminates, at no additional cost.

Formica Canada Inc. is located in St-jean-sur-Richelieu, Quebec, and employs more than 250 people.

Formica Canada is proud to be part of the Well Made Here local purchasing program.

As the inventor of high pressure laminate, Formica Corporation has always worked to provide innovative, high quality products. Efficient use of resources is at our core, and we have taken many steps to improve our environmental footprint - from reusing the water in our presses to incorporating recycled materials into our surfacing products. We are committed to a long-term planning horizon that includes becoming an industry-leading environmental steward.

HOW TO ORDER

We'll help you select the right case for your requirements. The steps below will help us to serve you best.

- 1 Choose the showcase that meets your displays requirements from the product specification sheets.
- 2 Review the options table found on the specification sheet and make your selections of the options provided.
- 3 Select from the large pallet of colours found on the last five pages of the brochure, or choose a stainless steel, standard black or white for the exterior finish of your showcase.
- 4 E-mail your request for a quote to your Cayuga sales representative or sales@cayugadisplays.com and we will quickly respond to your request. Please include your full contact information in case we have any questions.
