

THE **LUX** COLLECTION

INTRODUCING THE **LUX** COLLECTION

The Seating Shoppe was founded with a singular purpose: to bring designers' visions to life. We transform imaginative ideas into beautifully crafted seating, turning inspiration into reality.

Our curated LUX Collection was designed to inspire seating visionaries —meticulously considering every detail. No matter the challenge, we see extraordinary as the only answer.

We understand our customers' unique needs and are committed to fulfilling them with care and precision. Every vision is treated with the respect and attention it deserves.

Lounge chairs serve as the primary ambassadors of comfort and style. They are the first invitation for a guest to transition from the stress of travel into a state of relaxation.

Our chairs are upholstered in high-performance fabrics —such as treated velvets or reinforced linens— that can endure constant use and frequent cleaning while maintaining their original color and texture.

ETTA

A modern hotel lobby with beige lounge chairs, a dark wood coffee table, and a large potted plant. The room features large windows, a patterned rug, and a polished floor. The text is overlaid on a white rectangular background in the upper center of the image.

By selecting our lounge chairs with deep cushions and ergonomic support, a hotel lobby can be transformed from a simple waiting area into a sophisticated social hub where guests feel encouraged to linger.

Chairs and barstools from our LUX Collection serve as the primary bridge between the venue's aesthetic and the guest's physical comfort.

Beyond aesthetics, our hospitality seating meets rigorous commercial-grade standards to ensure safety and longevity. The frames are reinforced to handle high weight capacities and constant movement without compromising stability.
