# A HANDLE. A BLADE. AND 200 YEARS OF EXPERIENCE.

We've learned many lessons since we started in 1818. Everything from remembering to watch our fingers to how to perfectly balance our knives and tools. Our customers choose our knives, and because they do, we honor the responsibility that comes with it.

The vast majority of our knives and tools—including more than 1,000 unique styles—are made by about 250 craftspeople in Massachusetts. And the craft of knifemaking is one that our family has darn-near perfected by combining tradition with technique and modern technology. Oh, and over 200 years of fine-tuning.

## OUR HISTORY

**1818**

Henry Harrington starts the first American cutlery company in Southbridge, MA.

**1933**

The two companies come together and eventually become Dexter-Russell.

**1959**

The iconic Ted Williams fishing knife launches, receiving instant acclaim from outdoor enthusiasts.

**2022**

The ROSS-1® robotic sharpening system, which sharpens thousands of knives a day, is introduced to the processing industry.

**1834**

John Russell establishes the John Russell Cutlery company, ultimately replacing European brands and becoming the leading American cutlery company of the post-Civil War era.

**1941**

The first SANI-DEXTER knives are introduced, eventually evolving into the SANI-SAFE® series that remains the gold standard in foodservice today.

**1994**

The new Offset Bread Knife launches, and delis are forever changed.

# RUBBER KNIVES

Used mainly for the rubber and tire repair industries, these knives are suitable for a variety of slicing and trimming applications. With a heavy-duty durable blade to ensure ease of cutting through thick materials, these carbon steel blades will meet the challenging demands of the market. The durable hardwood handles offer a secure grip for control and accuracy when cutting.

## CARBON STEEL 101

Blades made with carbon steel hold a sharp, long-lasting edge. Blades may darken with age and use, thus creating a protective patina. If blade rusts, use an abrasive cleanser or lightly scrub with steel wool and periodically coat with mineral oil. Keep blades clean, dry, and oil for long storage.

# CRAFTSMEN'S KNIVES

The craftsmen's knives are designed for crafts and other industrial use around the home or workplace. The hardwood handles fit comfortably in your hand, while providing ample control for the most delicate work. Common uses are cutting stencils, leather for pattern making, bookbinding, and general woodworking.

# PUTTY KNIVES & SCRAPERS

Scrapers and putty knives help apply, smooth, and remove putties, paints, and other compounds from multiple surfaces. Each blade is produced from high-grade steel, which is tempered and ground for durability. Designed handles fit comfortably in your hand, even when using them for hours.

# LEATHER KNIVES

These leather knives are designed for use in shoemaking where tough, sharp blades are essential for cutting, trimming, and shaving thin layers off leather. Our variety of high carbon steel blades are also widely used in the other textile industries such as rubber, plastic, and paper. The durable hardwood pinned handles are formed and rounded to fit the hand for a secure and comfortable grip.

# PALETTE & INK MIXING KNIVES

Made for professional tradesmen or enthusiastic artisans, these knives are used to mix, scrape, lift, and spread paint or other mediums. The blades can have an angled edge for maneuverability or a flexible edge for drywall and plastering applications. The handles are contoured to ensure comfort while also offering ample control.
