From their factory, based in Saint-Léonard de Noblat, a few kilometers from Limoges (Haute Vienne - France), JL Coquet and Jaune de Chrome create and manufacture the purest porcelain, combining originality of shapes, delicacy of finishes and quality of products.

Rich in exceptional know-how, we have been implementing all of our manufacturing processes within our own factory since 1824 to offer porcelain entirely made and decorated in Haute-Vienne.

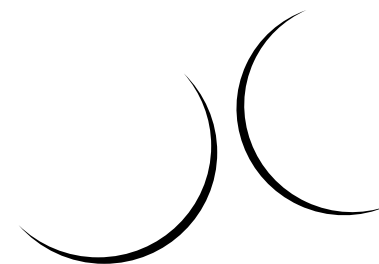

Thanks to this unique know-how, the Manufacture has been labeled Entreprise du Patrimoine Vivant (EPV) since 2010. Recognition mark of the Ministry of the Economy, Finance and Industry, this label distinguishes French companies with artisanal know-how and industrialists of excellence. Our manufacture also holds the Protected Geographical Indication (IGP) "Porcelaine de Limoges", producing all of its products in Saint-Léonard-de-Noblat.
