 Cayuga DISPLAYS

DEPARTMENT: STAND ALONE

When you add those specialty functions in your retail space you increase sales, but you also enhance the overall brand impression of your store.

Don't let the product - rich center areas or your store go under - utilized. Self-contained plug and play refrigerated displays provide the flexibility to quickly add appealing display options creating visible interest and maximum interest.

Perhaps it's ready to heat prepared food, a meal kit center, or freshly prepared sushi. Let's talk about all of the options. We'll help you find the right unit - or combination of units - to inject excitement and interest on your floor.

We'll help you develop your central zone to achieve the product attention and customer experience that will translate to product sales and customer loyalty!

"Cayuga has always provided us with sensible and reliable options and have always exceeded our expectations in customer service."

SINGLE-LEVEL SELF-SERVICE DISPLAY - 42" H

 REFRIGERATED

Standard features shown

Custom options available, refer to options schedule on next page.

MODEL	LENGTH
MRO-24-42	26 1/4"
MRO-38-42	40 1/4"
MRO-48-42	49 7/8"
MRO-57-42	59 3/8 "
MRO-76-42	78 1/2"
MRO-96-42	97 5/8"

FEATURES:

- Brushed Stainless steel internal cabinet construction
- Many exterior finish options available: powdercoat paint, brushed stainless steel, laminates and natural wood finishes
- 3 interior finish options: textured powdercoat black, white and brushed stainless steel
- Other custom options are offered. Refer to the options schedule on the next page
- A LED light strip is mounted on the top ledge of the display area. Various light intensities/spectrums are available
- Designed to maintain the critical temperature of the products within the display at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity
- ETL electrical certification and NSF-7 standards
- New R-513A (non-ozone depleting, low global warming potential) refrigerant used in the self-contained refrigeration system
- The refrigeration system is designed to pull fresh air from the front base of the display and vent through an integrated rear vent. The unique rear vent allows the display to be backed up against a wall or other displays/ obstructions
- Remote refrigeration available. Contact Cayuga Displays for details

SELF-CONTAINED FRONT SELF-SERVICE DISPLAY, REAR PREPARATION STATION & REFRIGERATED BASE STORAGE CABINET

 REFRIGERATED

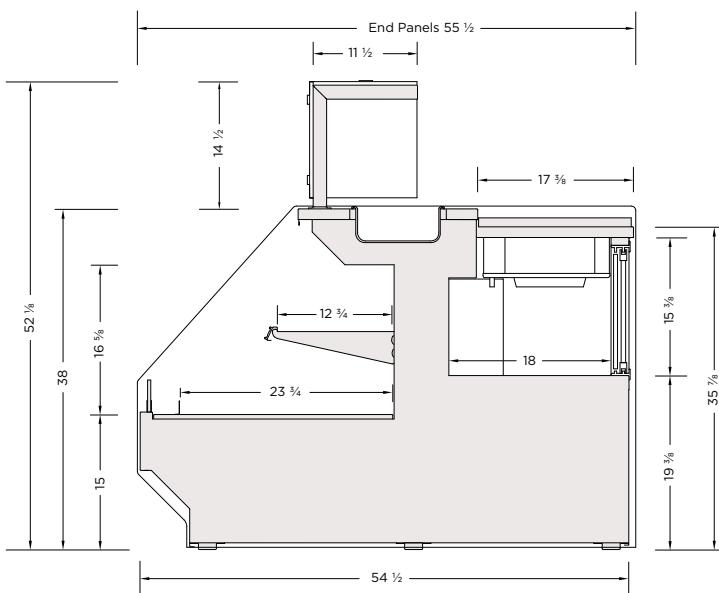

*Standard features shown
Pots not included*

*** 1/4 FOOD PANS & LIDS INCLUDED**

Custom options available, refer to options schedule on next page.

MODEL	LENGTH
OUW-4838-MS	50 1/4"
OUW-6038-MS	62 3/8"
OUW-7238-MS	74 1/2"
OUW-9638-MS	98 1/2"

FEATURES:

- Brushed stainless steel internal cabinet construction.
- Many exterior finish options available: powder coat paint, brushed stainless steel, decorative laminates and natural wood finishes.
- Three interior finish options: textured powder coat black, white and brushed stainless steel.
- The front décor panel can be extended to provide a more finished cabinet look. (A)
- Other custom options are offered. Refer to the options schedule on the next page.
- The refrigerated front self-service display has a LED light strip mounted to the top ledge of the display area, and one 12"D adjustable metal shelf with a front product stop and LED light strip mounted to the bottom of the shelf.
- The refrigerated rear storage cabinet is constructed of brushed stainless steel and has rear thermal sliding doors.
- The top preparation area has an integrated front refrigerated well to hold a series of 1/4 stainless steel food pans and lids. The prep counter is brushed stainless steel and has a removable white nylon cutting board.
- The top preparation area is protected with a front mounted tempered glass sneeze guard, top shelf and end panels.
- Designed to maintain the critical temperature of the products within the display, the storage cabinet and the top refrigerated well at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity.
- New R-513A (non-ozone depleting, low global warming potential) refrigerant used in the self-contained refrigeration system.
- ETL electrical certification and NSF-7 standards.
- The refrigeration system is located below the rear storage cabinet, pulling fresh air from the far right side of the display and exhausting heat on the far left.
- The refrigeration system is adjusted by two temperature controllers, one to control the front and top display and the other to control the rear storage cabinet.
- Condensate water is removed by an electrical evaporator. The top refrigerated well has a separate drain with a shutoff for cleaning purposes.
- Remote refrigeration available. Contact Cayuga Displays for details.

Note: Information and specifications may change due to engineering improvements.

THINGS TO CONSIDER

Showcases are designed to display your refrigerated products at 38-41°F (4-5°C). Showcases are designed to perform in environments of maximum 75°F (23°C) and 55% relative humidity.

****NOTE: FOR YOUR SHOWCASE TO FUNCTION AT PEAK EFFICIENCY YOU WILL NEED PROPER CLIMATE CONTROL AND AIR CIRCULATION****

You need to consider the following when selecting a showcase and placing it in your store environment:

1 Consider nearby doorways and vestibules

2 Consider nearby windows

3 Consider nearby vent sources, hoods, cooking equipment and fans

4 Ensure your display is level and plumb

A location near a doorway will negatively affect the airflow and holding temperature of both open and closed showcases.

Direct sunlight will negatively affect the holding temperature of both open and closed showcases.

HVAC ceiling vents, exhaust hoods, cooking equipment (steam heat) and ceiling fans will negatively affect the airflow of open showcases and will create condensation on the showcases if not properly managed.

Ensure your showcase is plumb and level to allow for proper drainage of condensation water.

Please note: These are critical points to ensure the best results for your equipment and efficient space – and the best return on your investment!

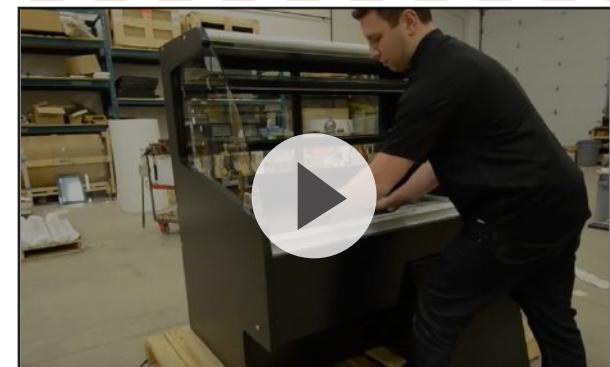

Regular Maintenance and Cleaning

Your showcase will work at its peak performance with regular maintenance. Refer to the Owner's Manual for maintenance and cleaning instructions.

To access the Owner's manual either visit us at cayugadisplays.com/resources/manuals or access the QR code located on the electrical box of your case. You can also check out our online maintenance video.

Watch our maintenance videos at <https://cayugadisplays.com/resources/videos>

5 Leave appropriate space behind display

6 Clean your condenser grill and pre-filter

7 ONLY PRE-CHILLED product in case

8 Noise

9 Condensation on closed and open cases

A 6" space is required behind any showcase that is against a wall or has a rear obstruction to allow for proper air flow around your showcase.

Use the included brush to regularly wipe away dust. Too much dust will not allow the refrigeration to work properly and could result in **expensive** damage.

Refer to Owner's Manual for additional case cleaning checklist

Refrigerated displays are designed to **KEEP COLD PRODUCT COLD** - they are not designed to bring warm products down to a cold temperature. For food safety it is always imperative that warm product be properly chilled (using a blast chiller or cold room) prior to storing in the refrigerated display case.

Self-contained cases have compressors, motors and fans and these will make noise. Keeping your showcase serviced and clean will help keep the noise level under control, improve lifespan, and maintain efficiency.

Condensation is caused by warm, moist air coming into contact with cool surfaces. If the case environment is not maintained below 75°F/23°C and 55% relative humidity, condensation may occur.

TIPS TO COMBAT CONDENSATION

Showcases are designed to display your refrigerated products at 38-41°F (4-5°C). Showcases are designed to perform efficiently correctly when placed in environmental conditions of maximum 75°F (23°C) and 55% relative humidity.

****NOTE: FOR YOUR SHOWCASE TO FUNCTION AT PEAK EFFICIENCY YOU WILL NEED PROPER CLIMATE CONTROL AND AIR CIRCULATION****

1 Condensation on closed and open cases

2 Consider nearby doorways and vestibules

3 Consider nearby vent sources, hoods, cooking equipment and fans

Condensation is caused by warm, moist air coming into contact with cool surfaces. If the case environment is not maintained below 75°F/23°C and 55% relative humidity, condensation may occur.

A location near a doorway will affect the humidity that encounters your showcase which may cause condensation to occur.

- Relocate showcase away from doorways
- An air-conditioned vestibule will help to mitigate condensation

HVAC ceiling vents, exhaust hoods, cooking equipment (steam heat) and ceiling fans will affect the airflow of open showcases and will create condensation on the showcases if not properly managed.

- Maintain environment below 75°F/23°C and 55% relative humidity
- Turn on air-conditioner and dehumidifier

Please note: These are critical points to ensure the best results for your equipment and efficient space – and the best return on your investment!

Regular Maintenance and Cleaning

Your showcase will work at its peak performance with regular maintenance. Refer to the Owner's Manual for maintenance and cleaning instructions.

To access the Owner's manual either visit us at cayugadisplays.com/resources/manuals or access the QR code located on the electrical box of your case. You can also check out our online maintenance video.

Watch our maintenance videos at <https://cayugadisplays.com/resources/videos>

4 Ambient humidity and temperature

Maintain environmental conditions during working and non-working store hours.

- Consider recirculating your conditioned air instead of bringing in fresh air from outside
- Turn on air-conditioner and dehumidifier
- Keep the A/C on even when it's cool outside as well as overnight
- Schedule regular maintenance for both A/C and dehumidifier as it frees parts and device of dirt, dust and other pollutants that can affect performance

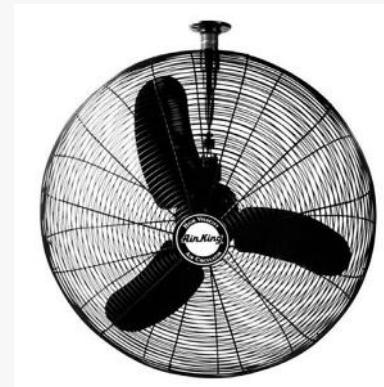

5 Small store footprint

If your space is small, consider adding a dehumidifier.

- Install a dehumidifier with a floor drain to ensure humidity levels remain consistent
- Regular maintenance for dehumidifier is recommended (refer to manufacturers specifications)

6 Air circulation

Ceiling fans help to mix dry air near the ceiling with cold moist air at ground level.

- Consider recirculating your conditioned air instead of bringing in fresh air from outside

7 Hot bars with steam wells

Both Soup wells and food bars that rely on steam to heat products produce steam that will raise the moisture levels

- Use dry heat wells
- Turn on dehumidifier to maintain 55% relative humidity

Formica® Laminate

Formica Group provides surfaces that fuse beautiful design with purposeful functionality. Formica® Products provide versatile surfacing solutions that are inspired by and adapt to the way people live, work and play.

Formica® Brand Laminate offers a broader range of looks than ever before. Transform spaces with our modern laminates that are as beautiful as they are durable. Mix and match solids, patterns and finishes.

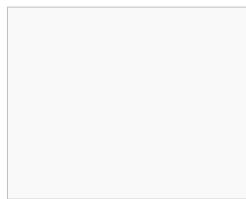

Product Features:

- Postforming
- Durable and Wear-resistant
- Horizontal and Vertical
- Impact Resistant

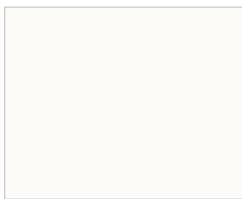

Formica® EliteForm

Our innovative Formica® EliteForm surfacing technology redefines the performance attributes of high pressure laminate to deliver a more durable laminate for today's market. Formica® Laminate with EliteForm features superior scratch resistance over other laminate brands, the ability to postform to a smaller radius with better blister resistance, and more durable, long-lasting surfaces, including the Gloss texture in horizontal applications. EliteForm comes standard on all Formica® Laminates, at no additional cost.

Formica Canada Inc. is located in St-jean-sur-Richelieu, Quebec, and employs more than 250 people.

Formica Canada is proud to be part of the Well Made Here local purchasing program.

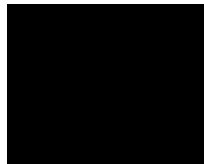

As the inventor of high pressure laminate, Formica Corporation has always worked to provide innovative, high quality products. Efficient use of resources is at our core, and we have taken many steps to improve our environmental footprint - from reusing the water in our presses to incorporating recycled materials into our surfacing products. We are committed to a long-term planning horizon that includes becoming an industry-leading environmental steward.

HOW TO ORDER

We'll help you select the right case for your requirements.
The steps below will help us to serve you best.

- 1 Choose the showcase that meets your display requirements from the product specification sheets.
- 2 Review the options table found on the specification sheet and make your selections of the options provided.
- 3 Select from the large pallet of colours found on the last five pages of the brochure, or choose a stainless steel, standard black or white for the exterior finish of your showcase.
- 4 E-mail your request for a quote to your Cayuga sales representative or sales@cayugadisplays.com and we will quickly respond to your request.
Please include your full contact information in case we have any questions.
